How we understand caring situations

Caring scenarios are based on...						
Your age group <i>What stage of life?</i>	Child	Young Person	Adult	Older Adult		
Your relationship <i>Who are you caring for?</i>	Parent / Grandparent	Sibling	Child / Grandchild	Spouse / partner	Unrelated (e.g. neighbour)	
Your situation <i>What is your life like?</i>	Caring for multiple individuals	Working	Unemployed / retired	In education	Living separately to cared-for individual	Living with a disability or illness

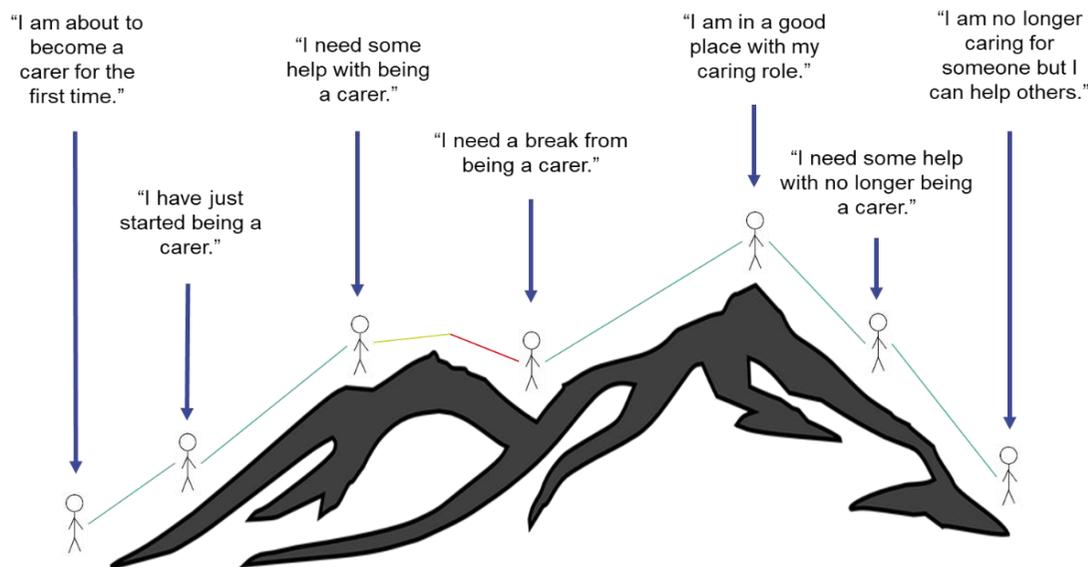

The Social Services and Well-being Act defines a “carer” as “a person who provides, or intends to provide care for an adult or disabled child”.

Carers’ age, relationships and situations are rarely static. We recognise that people can become carers gradually, but caring can also be thrust upon people through life events.

The caring journey can be difficult and rewarding, just like climbing a mountain. It does not take place linearly, paths can undulate and terrain can change.

Carers will begin the journey with varying levels of knowledge and experience. They may find that along the journey they need help or need a break to get them to being in a good place and they can move between these parts of the journey continuously for the duration of the journey. Carers also need support when transitioning from a caring role.
